

AMBITUS

A SYMPHONY OF LIGHT AND SPACE

From an idea ...

best of the best

...to the award winning product.

*“Purely linear lighting
can no longer meet
the needs of complex,
organic building design.
AMBITUS solves this
geometric paradox.”*

THE HARMONY OF OPPOSITES.

AMBITUS has it all. This exceptional office light lives up to this claim in every way: advanced technology meets multiple-award-winning design. Diffused indirect lighting meets precise, workplace-friendly direct lighting. Peak brightness meets excellent glare control. AMBITUS unites apparent opposites in a slim, deep-drawn aluminium body that floats in the space with a light and delicate appearance, creating a lighting effect as round as the luminaire's shape. Harmonious light, inspired by the sun.

BRILLIANT, GLARE-FREE LIGHT.

Be it for a meeting room, desk or lobby, AMBITUS creates powerful light that adapts to different office settings. Encouraging social interaction, creating a focused work atmosphere or boosting brand image: the huge range of lighting options gives lighting designers and users incredible flexibility.
Maximum light, minimum glare.

TWO IN ONE.

A single ring-shaped luminaire does the job of two linear ones. Thanks to the excellent luminous flux up to 10 000 lumens, AMBITUS can illuminate two workplaces. Top light performance with premium visual comfort. Faceted micro-reflectors reduce glare and ensure an outstanding UGR of up to < 13.

AMBITUS has a special lightness, seeming almost to float, thanks to its slender suspension cables. Instead of an unsightly fitting, the luminaire has a seamless power supply.

Diffuse, undirected light and precise direct light can be controlled separately on the tunableWhite version. The luminaire is adjusted using DALI or Bluetooth with a simple control element or handy smartphone app.

TunableWhite adds an emotional element to the visual component of AMBITUS office lighting. From warm white (2700K) to daylight white (6500K), the light temperature can be chosen to harmonise with our activities at different times of the day.

Micro-reflectors in a circular array provide strong contrast and a stunning light effect, making the room and objects particularly vivid while visually enhancing structures, almost tangibly.

A CELESTIAL BODY FOR THE OFFICE.

AMBITUS mimics sunlight in an office setting. Just 24 mm in depth, it hangs softly in the room with an invisible power supply.

The anodised aluminium light ring is captivating due to its minimalist shape and maximum luminosity. The contrast between the fixture and the brilliant light is stunning: a perfect blend of aesthetics and technology.

AMBITUS

Dimension:	Ø 600 mm, depth 24 mm	
Housing material:	anodised aluminium	
Luminous flux:	up to 10 000 lm	
Mounting type:	recessed or surface-mounted ceiling rose with suspension length of up to 2m	
Colour rendering:	CRI > 90	
Glare control:	UGR < 13 and L < 1000 cd/m ² at 65°	
Colour temperature:	3000K, 4000K, tunableWhite	
Controls:	DALI dimmable, basicDIM Wireless on the tunableWhite version, the direct and indirect light can be controlled separately	
Housing colour:	 black	 silver
