Ultra Soft silicone electric cable with Glossy Fire Red fabric lining - RM09
round 2x0,75 mm

Description

Sleek softness and distinctive colours for the newest Creative-Cables Ultra Soft cable. Thanks to the silicone sheath, this electric cable with fabric lining has reached new levels of flexibility. Straight and flawless falls for every suspension lamp while still avoiding unsightly bumps; and, needless to say, the red fabric lining will be sure to impress.

What is the main difference between silicone and traditional cables?

The Ultra Soft silicone cables are softer and more flexible compared to traditional cables with fabric lining and PVC sheath. Designed to avoid unsightly protrusions, this product still maintains the same safety and efficiency of our other cables.

What are the advantages of using silicone cables?

These electric cables with fabric lining are made extremely flexible thanks to the silicone sheath which ensures great elasticity while still maintaining the same resistance and performance found in traditional cables. This makes them the perfect choice for moments where cable flexibility is crucial.

How will this red cable present itself?

Red and vibrant, this colour surely doesn't go unnoticed. The Ultra Soft electric cable in this shade is the ideal choice for those looking for a gorgeous product that catches the eye, bringing flair and personality to any room, in domestic or commercial settings alike. Thanks to its incredible flexibility, the Ultra Soft silicone cable in red fabric lining will adapt to any customized solutions based on your needs and taste.

Attention: the cable is sold by the metre, multiple orders will be delivered in one whole part up to a maximum of 50 metres.
